**Subject:** RE: York County ARPA Funding Request - Kennebunk  
**Importance:** High

Hi Greg –

Another project just came to light. If possible and if applicable, could the following be added to Kennebunk's project list?

Public Health and Safety – Monitoring Shark Activity near Kennebunk's Beaches: Due to increased shark activity during the last several years, Kennebunk in conjunction with the University of New England is proposing to place a real-time sensing buoy off of Kennebunk's beaches. In addition, drones with video would be purchased and used to visually investigate any possible sightings. Estimated total project cost: \$28,000

Please let me know if you need more information.

Hopefully this can be added to our request.

Thank you.

- Joel

Hi Joel,

At this point in the process the list that you have provided is fine. If more information is needed we will let you know.

Greg
